

The List of Interpreted Laboratory Tests [November 28, 2025 Update]

We currently provide automated interpretation for a comprehensive range of commonly ordered laboratory tests, **covering approximately 85% of the typical test volume.**

We continuously expand the list of supported tests and parameters based on our partners' needs and patient demand.

- | | |
|-----------------------------------|-------------------------------|
| 1. TSH | + Lymphocytes# |
| 2. FT4 | + Neutrophils |
| 3. FT3 | + Monocytes# |
| 4. Anti-TPO | + Eosinophils# |
| 5. Anti-TG | + Basophils# |
| 6. TSH Receptor Antibodies (TRAb) | + Immature Granulocytes# |
| 7. Complete Blood Count (CBC) | + Lymphocytes% |
| (5-DIFF): | + Neutrophils% |
| + White Blood Cells (WBC) | + Monocytes% |
| + Red Blood Cells (RBC) | + Basophils% |
| + Hemoglobin (Hb) | + Eosinophils% |
| + Hematocrit (Hct) | + Immature Granulocytes% |
| + MCV | + Blasts |
| + MCH | |
| + MCHC | 8. Total Cholesterol |
| + RDW-SD | 9. Lipid Panel: |
| + RDW-CV | + Total Cholesterol |
| + Platelets (PLT) | + LDL Cholesterol, calculated |
| + PDW | + HDL Cholesterol |
| + MPV | + Non-HDL Cholesterol |
| + P-LCR | + Triglycerides |
| + PCT | + Direct LDL Cholesterol |

10. Direct LDL Cholesterol

11. GGTP

12. AST

13. ALT

14. ALP

15. Total Bilirubin

16. Estradiol

17. FSH

18. LH

19. Progesterone

20. Testosterone

21. Serum Creatinine + eGFR

22. ESR (Erythrocyte Sedimentation Rate)

23. CRP

24. Iron

25. Glucose

26. Urea

27. Sodium

28. Potassium

29. Uric Acid

30. Vitamin D 25 (OH) metabolite

31. Prolactin

32. Total PSA

33. Magnesium

34. PT (INR)

35. APTT

36. Amylase

37. CA 19-9

38. CEA

39. Chlorides

40. Glycated Hemoglobin (HbA1c)

41. Insulin

42. Lipase

43. Total Calcium

44. General Urine Examination (Urinalysis):

+ Bilirubin in urine

+ Urobilinogen in urine

+ Glucose in urine test

+ Blood

+ Leukocytes in urine test

+ White blood cell clumps

+ Leukocytes in urine sediment

+ Fresh erythrocytes in urine sediment

+ Erythrocytes in urine sediment

+ Erythrocyte clumps

+ Leukocyte casts

+ Leached erythrocytes in urine sediment

+ Partially leached erythrocytes in urine sediment

+ Granular casts

+ Renal epithelial cells

+ Dysmorphic erythrocytes

+ Erythrocyte casts

+ Pathological casts

+ Hyaline-granular casts

+ Finely granular casts

+ Nitrites

+ Protein in urine test

+ Ketones

+ Bacteria in urine sediment

+ Bacterial casts

+ Cocci bacteria

+ Rod bacteria

+ Urine color

+ Urine specific gravity

- + Urine clarity
 - + Amorphous urates
 - + Urine pH
 - + Round epithelial cells
 - + Calcium oxalate crystals
 - + Amorphous phosphates
 - + Uric acid crystals
 - + Ammonium-magnesium phosphate crystals
 - + Ascorbic acid in urine sediment
 - + Transitional epithelial cells
 - + Epithelial casts
 - + Cellular casts
 - + Broad casts
 - + Fatty casts
 - + Waxy casts
 - + Other casts
 - + Unclassified casts
 - + Fat cells
 - + Fat
 - + Cystine crystals
 - + Leucine crystals
 - + Calcium phosphate crystals
 - + Triple phosphate crystals
 - + Ammonium urate crystals
 - + Drug crystals
 - + Other crystals
 - + Magnesium diphosphate crystals
 - + Bilirubin crystals
 - + Crystals
 - + Tyrosine crystals
 - + Calcium carbonate crystals
 - + Calcium sulfates
 - + Unclassified crystals
 - + Calcium oxalate monohydrate
 - + Calcium oxalate dihydrate
 - + Spermatozoa in urine test
 - + Squamous epithelial cells
 - + Mucus threads
 - + Hyaline casts
 - + Yeast cells
 - + Fungal hyphae
 - + Trichomonas vaginalis
 - + Budding yeast
 - + Fungal hyphae in urine sediment
 - + Protozoa
 - + Pinworm eggs
 - + Comment on urine test
45. AFP
 46. CA 125
 47. CA 15-3
 48. CA 72-4
 49. HOMA-IR
 50. Ferritin
 51. Transferrin saturation (TSAT)
 52. Vitamin B12
 53. Folate (serum folate)
 54. D-dimer
 55. Beta-hCG (β -hCG)
 56. Borrelia burgdorferi antibodies, IgG (Lyme disease IgG)
 57. Borrelia burgdorferi antibodies, IgM (Lyme disease IgM)
 58. Syphilis screening
 59. Anti-HCV (Hepatitis C antibody)
 60. Anti-Müllerian hormone (AMH)
 61. Serum zinc
 62. DHEA-S (dehydroepiandrosterone sulfate)

63. Phosphate (inorganic) / Serum phosphate
64. hs-CRP (high-sensitivity C-reactive protein)
65. Inhibin B
66. Cortisol
67. Leptin
68. Anti-tissue transglutaminase IgA (tTG-IgA), CLIA method
69. SHBG (sex hormone-binding globulin)
70. Free testosterone
71. TIBC (total iron-binding capacity)
72. Homocysteine
73. Lipoprotein(a) [Lp(a)]
74. CYFRA 21-1
75. Androstenedione
76. HE4
77. Adiponectin
78. ASO (Antistreptolysin O, quantitative)
79. Insulin after glucose load (at 60 min.)
80. Insulin after glucose load (at 120 min.)
81. Rheumatoid factor (quantitative)
82. Creatinine in 24-hour urine collection
83. Anti-CCP (Anti-citrullinated protein antibodies)
84. Soluble transferrin receptor
85. Selenium
86. T3 (total)
87. T4 (total)
88. Vitamin H (biotin)
89. ROMA
90. HIV Ag/Ab (Combo) (screening test)
91. HBs antigen
92. HBs antibodies
93. HBc total antibodies
94. HBc IgM antibodies
95. HBe Antigen
96. HBe Antibodies
97. Giardia lamblia IgM in serum
98. Giardia lamblia IgG in serum
99. Albumin
100. Diamine oxidase (DAO)
101. Pertussis (Bordetella pertussis) IgM
102. Iodine, quantitative
